Summary

I'm a dedicated professional with a strong focus on problem-solving and achieving significant goals. Currently, I'm involved in AI, ML, and DL projects, gaining hands-on experience in developing machine learning solutions. With a background in software testing, content writing, and public speaking, I excel in communication and collaboration, always aiming to make technology more user-friendly.

Education

Bachelor of Technology

TMU, Moradabad
Aug, 2022 - Jul, 2026

Intermediate

St. Anthony's Sr Sec School
Apr, 2021 - Apr, 2022

Technical Skills

Software Development, GenAI, Python, C++, HTML, CSS, JS, SQL

Soft Skills

Problem-solving, Digital Fluency, Communication, Time management, Result-oriented, Digital Collaboration

Additional Skills

Public Speaking, Technical Research, Sports and Fitness, Crypto Trading

Languages

English, Hindi, Urdu

Certifications

- Certified ML Trainee at Internshala
- Certified Speaker and Writer

Work Experience

Team Everest NGO

Nov, 2022 - Jan, 2023

Writer / Speaker

I had the opportunity to work with Team Everest NGO as a speaker and writer, where I helped to spread awareness on social issues. I shared impactful stories, and my speaking engagements aimed to inspire and motivate others to take action.

- I used my voice to raise awareness and drive change.

Tester.io

Jun, 2023 - Apr, 2024

Software Tester

I worked at Tester.io, where I gained hands-on experience in testing applications and software remotely. During my time there, I focused on evaluating functionality, usability, and performance, providing valuable feedback to enhance user experience.

- I developed expertise in remote software testing, significantly improving app performance and user satisfaction.

Internshala

Aug, 2024 - Oct, 2024

Trainee

I joined Internshala for machine learning training, where I gained hands-on experience in model development and key ML algorithms. This training strengthened my skills in data analysis and model building, further fueling my passion in AI and ML.

- I advanced my skills in machine learning, mastering algorithms and data-driven problem-solving techniques.
- I also had the opportunity to work on real-world projects, applying my knowledge to solve practical challenges.

Projects

Stock Price Prediction

Oct, 2024 - Dec, 2024

<https://github.com/asimhusain-ai/Stock-Price-Prediction.git>

I developed a stock price prediction web app using LSTM to forecast prices based on historical data. Users can input a stock symbol to receive predictions displayed through interactive charts. This project significantly enhanced my skills in ML.

- Achieved accurate predictions by leveraging historical data.
- Enhanced model performance through data preprocessing and tuning.
- Designed a user-friendly interface for easy interaction.
- Gained experience integrating machine learning with web development.
